

## Afa Zeynalli

Hello! My name is Latafat, but in short better to call me Afa. I shall be your guide during the International Chemistry Olympiad. I graduated my bachelor and master degree from Baku branch of Mosccow State Universit and now I am working as a teacher of English at the language school. I am very much fond of reading, cooking, studying languages, dancing and travelling. I visited a number of countries and consider this to be exciting and very useful. Baku is my native city and I love it very much. Many reasons can stand for this; especially I would like to emphasize the atmosphere of my city which I am sure will attract you greatly. Wish you all good luck during the Olympiad and hope that you will be fascinated by our Baku, its culture, people, cuisine and many other interesting layers of our life. So, see you soon and do your best!
