

Afsana Askerli

Dear young chemist! My name is Afsana. I shall be your guide during the time of the International Chemistry Olympiad. I do my master in developmental psychology in MSU (Baku branch). At the same time I practice as child and adolescent psychologist. I like dancing and painting, reading, making photos. I try to fulfill my life with bright colors. I cook cakes with a great pleasure. I'm interesting in studying languages and traditions of different cultures. I like traveling and I'm sure that a little travel is equal to a good book. I love Baku's wind. I'm happy to greet you here in Baku! Wish you good luck at the Olympiad and many interesting findings here. Close your eyes for a moment and try to feel how gentle Baku breeze embraces you and give you force to win. But don't always think about victory! Enjoy your time. Be in fond of what you do and try to show us, how beautiful and wonderful chemistry is. See you at the Olympiad in Baku!
