

Guzel Kamaletdinova

Hello! My name is Guzel. I shall be your guide during the time of the International Chemistry Olympiad. I study at Moscow State University (Baku Branch) at the department of French philology. I am so happy that I will work with you , because I am obsessed with the former Yugoslavian countries and I even started learning serbo-croatian language. Beaside that I am interested in cooking, literature and sport. I also love traveling, exploring new places and to meet new people. I always share my free time with my friends, because communication is the most important part of my life. Azerbaijan is my homeland and I have been living in Baku for 20 years . There are a lot of places to see in Baku as the Maiden Tower, the Palace of Shirvanshakhs, the Old Town, Daghustu Park and etc. I wish you good luck and I hope that you will be the

champions of the 47th International Chemistry Olympiad. I am looking forward to your arrival. See you soon.
