

Huseynali Alili

Hi! My name is Huseynali. I'm 20 years old. I am studying chemistry at the Moscow State University Baku branch 3th year. I'm very happy to be a guide at the International Chemistry Olympiad that will be held in my motherland. I love Azerbaijan, the country that brings together ancient traditions and modern life. Old castles and high buildings make me feel like East and West are combined here. I'm addicted to the nature, especially spring in Azerbaijan is unforgettable. I like meeting interesting people, getting new information every day, cycling, playing volleyball and walking. Also I'm interested in astronomy and biology. As you have probably heard Azerbaijan is *the land of fire* so I wish you to be on fire during the Olympiad and never let this go out!
