

Ilkin Agayev

Hello! My name is Ilkin. I am 20 years old. I live in Baku. I study in Chemistry faculty at Moscow State University, Baku branch. I am in my third year. I love chemistry, because, first of all, chemistry is everywhere: everything that surrounds us consists of chemical elements, which predetermines its properties. In addition, I love reading and combine it with study. It is part of my life. In my spare time I love to go for a walk in many fascinating places of our city with my friends. Furthermore, I like to play billiards and fishing. I hope being the guide during the International Chemistry Olympiad will be successful experience for me. Wish you success at the Olympiad!
