

## Medina Javadli

Hello! My name is Medina and I'm a student of Moscow State University Baku Branch, and I study psychology. I shall be your guide during the time of the International Chemistry Olympiad. I like drawing and taking photos. Also I'm fond of reading, meeting new people and making new friends from all over the world, and travelling. I've been an exchange student for one year in the USA and I had an amazing time over there. It was a great experience for me. I hope you all will spend wonderful days in Baku, make new friends and gain some experience that will help you on further international events. Hope we'll make a great team and have an interesting time together. Wish you good luck to all of you and make your best at the Olympiad! See you soon in Baku!
