

Nara Mamedova

Hello, my dear friends! My name is Nara and I am one from the guides of the International Chemistry Olympiad. I'm 18 years old and second year student of English philology at the Baku Branch of Lomonosov Moscow State University. It's my second home, and I am very glad to study exactly in this university! I'm highly pleased to be your guide, because communicate with people from other country is a very big experience and amusing pastime. Unfortunately, I have never been in any foreign country, that's why I would like to listen to your stories about your country. I hope we'll see each other in summer. Good luck!
