

# Nargiz Abbasova

Hello! The purpose of this letter is to introduce myself as your guide during the International Chemistry Olympiad. My name is Nargiz, I'm studying management at Moscow State University name after M. V. Lomonosov, Baku branch. I'm on my first year of university and I would like to get the second degree in psychology science, it seems to be very interesting for me. I also enjoy learning languages, especially English and German. I like travelling a lot it gives opportunity to learn more about places, people, different cultures. Sometimes I can draw something, inspired by the book, or good film. Time spent with my friends on nature seems to be the best way of having a rest. Wish you good luck and hope to see you soon!
