

## Sabina Salikova

Hello! My name is Sabina. I shall be your guide during the time of the International Chemistry Olympiad. I graduated from the International College of the english faculty and Baku branch of MSU of the french philology. My hobbies are music, foreign languages, communication with friends from other countries. Knowledge of languages opens up a new world to us, helps us to understand each other better. I think that we shall become close friends too, we shall know many interesting things about our countries: people, culture, traditions, cooking. I wish you to win at the Olympiad! See you in Baku!
